Forus White Paper

Version 2

21 January 2022
it's more, for all..

Cryptocurrency introduction

Cryptocurrency exists as a fully digital and decentralized money like medium with almost no regulatory or centralized authority. Even more, it works as a separate peer-to-peer, blockchain powered, exchange entity allowing global transactions independently from any central bank, sovereigns, and fiats.

To guarantee the security and verifiability of the peer-to-peer transfers, the crypto entities are secured through private or public keys that are connected directly to the receiver's wallet. This technology offers many advantages in the financial market, such as portability, divisibility, inflation resistance, and transparency.

Forus Vision

To be the most trusted exchange platform cryptocurrency excellence and customer experience worldwide.

Forus Purpose

Create a competitively low cost, no scam, and globally accessible cryptocurrency.

Forus Goal

Forus team believes that the project will grow with the suggestions and involvement of its community. Our goals is to improve the customer experience and gain customer trust through our services.

Why Forus ?

Forus team is developing this project for everyone who believes in the power of blockchain technology and wants to make an impact on society by giving people more control over their data.

What is Forus ?

We are a community-based token and platform. The more you participate, the more everyone benefits!

- Forus Token is based on three key principles: work together to create value for others; be open and welcoming to participants in your project; always act with benevolence, honesty, and integrity.
- Forus Platform is an exchange platform which is focusing to solve two major issues, the first is scalability issues, and the other involves low liquidity in cryptocurrency markets due to high volatility or unpredictable price movements.
